EDUCATION

Ethics University, Uttarakhand — *Bachelor of Technology (BTech) in Computer Science | Currently Pursuing*

- Semester 1: 62.20% (SGPA: 6.80)
- Semester 2: 61.67% (SGPA: 6.67, Cumulative CGPA: 6.74)

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, JavaScript, HTML, CSS, Bash, SQL
- **Frontend Frameworks & Libraries:** React.js, Next.js, Tailwind CSS
- **Backend Frameworks:** Node.js, Express.js, FastAPI
- **Databases:** PostgreSQL (Neon), MongoDB (MERN Stack)
- **Tools & Platforms:** Git, GitHub, Render, Vercel, Visual Studio Code, Windsurf
- **Operating Systems:** Linux (Arch, CachyOS, Bazzite), Windows

PROJECTS

Full-Stack Personal Blog Platform — *Next.js, FastAPI, PostgreSQL, Vercel, Render*

- Developed and deployed a comprehensive full-stack blog application.
- Engineered a robust REST API backend using FastAPI, hosted on Render, and connected to a Neon PostgreSQL database for structured data management.
- Built a highly responsive frontend interface utilizing Next.js, deployed via Vercel for optimized performance and edge delivery.

Dynamic Weather Dashboard — *Web Technologies*

- Designed and published a responsive weather application (weather-app-final) featuring real-time condition tracking and a 5-day forecast display.
- Implemented dynamic UI enhancements, including conditional weather background animations based on live meteorological data.

Employee Management System — *Web Technologies*

- Architected a specialized application (employeems) designed for structured personnel tracking and internal organizational management.

- Maintained strict version control and collaborative deployment readiness using Git and GitHub.

Task Management Application — *Web Technologies*

- Developed a functional, state-driven tracking application (todo-app) focused on optimizing task lifecycle management and user productivity.

NoteFlow — *Vite, Express.js*

- Architected a full-stack note-taking platform with separate client and server modules.
- Prepared multi-directory deployment support on Vercel for scalable frontend and backend distribution.

Kanban Task Management — *Express.js, Web Technologies*

- Engineered a visual task tracking system utilizing a Kanban board structure to improve workflow efficiency.
- Configured server deployment workflows for streamlined hosting on Vercel.

NexusMarket — *Express.js, Web Technologies*

- Developed an e-commerce platform backend service aimed at facilitating digital trade and item listings.
- Integrated seamless cloud deployment pipelines via Vercel.

Blog Manager — *Next.js*

- Created a Next.js web application designed for content publishing and blog maintenance.
- Automated deployment configurations with Vercel for fast edge rendering.

Finance Manager — *Vite, Web Technologies*

- Designed a dynamic personal finance and expense tracking tool leveraging modern Vite frontend architecture.
- Optimized build assets and deployed production builds directly on Vercel.

Task Manager (Vite) — *Vite, Web Technologies*

- Built a fast, lightweight task tracking dashboard focused on user productivity and interactive list management.
- Set up automated continuous deployment with Vercel.
